

Table S2. OTU counts and abundance of detected potential bacterial biocontrol agents in the suppressive Inneruulalik soil.

<i>Suppressive soil</i>				
<i>Family/Genus</i>	<i>OTUs¹</i>	<i>‰</i>	<i>STD</i>	
<i>Pseudomonadaceae</i>	6	0.61	±0.11	
<i>Pseudomonas</i>	3	0.42	±0.19	
<i>Bacillaceae</i>	12	0.61	±0.27	
<i>Bacillus</i>	4	0.27	±0.07	
<i>Paenibacillaceae</i>	9	0.46	±0.02	
<i>Paenibacillus</i>	8	0.39	±0.15	
<i>Streptomycetaceae</i>	75	17.41	±2.48	
<i>Streptomyces</i>	18	5.92	±1.19	
<i>Burkholderiaceae</i>	4	0.31	±0.29	
<i>Burkholderia</i>	2	0.23	±0.30	

¹ OTUs were clustered at 97% identity and the reported counts include singletons.
